

DATA - DATA SCIENCE

DATA 200

Introduction to Data Science with R

3 Credits **Weekly (2-2-0)**

This course introduces the fundamental concepts of data science using the R programming language. Students will learn how to acquire, clean, manipulate, visualize, and analyze data, as well as build predictive models and extract valuable insights from data sets.

Prerequisites: Minimum grades of C- in CMPT 103 and one of STAT 151 or STAT 161.
