PHSD – PHYSICAL EDUCATION

PHSD 391
The Human Organism
3 Credits Weekly (3-0-0)
This course is an introduction to human biology that analyzes the structure and function of systems in our bodies. This course leads to an appreciation of how the human body maintains itself in the face of external and internal challenges. A course for non-majors that will develop their understanding of the foundations of human health and disease. Note: This course is only available to Disability Studies Program students. Credit can only be obtained in one of PEDS 391 or PHSD 391.
Prerequisites: Biology 30.
