SCHOOL OF SOCIAL WORK

Transformative, collaborative, and supportive education: it's at the heart of what we do. The same qualities are at the heart of what social workers do when they work with families, provide support, and transform lives in the communities where they live and work. Students are prepared with the competencies and professional skills to assess and practice in a professional social work setting. Faculty members have a wide range of expertise in social work education, strong connections with the community, and active engagement in research and scholarly activities to advance social work knowledge and education.

Director
