

DEPARTMENT OF NURSING SCIENCE

The Bachelor of Science in Nursing (BScN) program is offered through the Department of Nursing Science. The mission of the BScN program is to prepare outstanding graduates who are committed to excellence in professional practice and who contribute to the health and well-being of individuals, families, communities, and society. Students are supported in their learning by faculty members having theoretical and/or clinical expertise in the study area and a passion for teaching. Program graduates possess the requisite knowledge, skills and other attributes to practice safe, ethical and evidence-informed nursing, both independently and collaboratively, with patients/clients and interprofessional/intersectoral members in diverse settings. Graduates demonstrate critical inquiry, clinical judgment, flexibility and creativity, and are able to function ethically and effectively in unpredictable and complex situations. Graduates may also transition into the practice domains of administration, education and research.
