

NURSING

The Faculty of Nursing offers innovative and diverse programming designed to meet the transformative and educational needs of those aspiring to become registered nurses (RNs) or registered psychiatric nurses (RPNs), as well as practicing RNs and RPNs, and other health professionals. The Faculty of Nursing provides leadership that informs teaching and learning innovations that foster academic excellence. This excellence is advanced by creating an environment that develops partnerships, supports the well-being of students, faculty, and staff, and cultivates a culture of research and scholarship. Our mission is to create transformative learning opportunities in nursing and professional practice, as we work toward achieving our vision of nurses making a difference in the health of global communities.
