## ACCOUNTING AND STRATEGIC MEASUREMENT

## Overview

School of Business
MacEwan.ca/Accounting (http://\%E2\%80\%8BMacEwan.ca/Accounting/)
Success in today's business world depends on sound decisions based on timely, accurate and well-directed financial information. Successful accounting students have good analytical skills, are able to work in a team environment and are self-motivated. In addition, they need effective oral and written communication skills for success.

The Accounting and Strategic Measurement diploma provides a comprehensive overview of accounting procedures and principles. Students in the program learn about management, cost and financial accounting, finance, taxation, computer applications and management skills, providing them with intermediate level accounting knowledge.

## Career Potential

Graduates of the diploma apply their training and skills as accountants in private business, public accounting firms, financial institutions, government, hospitals, industry and consulting firms. Common starting positions include analysts, junior accountants, payroll accountants, financial accountants, cost accountants, assistant controllers and accounting technicians. The experience and learning acquired through the integration of technology gives graduates unequalled leverage in the job market.
