

MUSIC TECHNOLOGY AND PRODUCTION MINOR

For Bachelor of Music

The Music Technology and Production minor offers a Program of Study that prepares students to enter the industry in a variety of roles. Courses in this minor include recording studio and production techniques, acoustics, and applications in music technology. Students acquire professional-level skills in AVID Pro Tools and other essential industry-standard software. The program of study also includes core Bachelor of Music courses in performance, theory, aural skills, cultural studies of music, and the business of music.

The Music Technology and Production minor is competitive, and students apply during their first year of the Bachelor of Music. In addition to the common core courses students will take in their first year, the minor follows a prescribed program of study, and students choose from music options and non-music electives to customize their program.
